

Updating the ZOOM App on JCU computers

Step 1: Connect to the Forticlient  VPN and Sign in with your JCU Email address and password

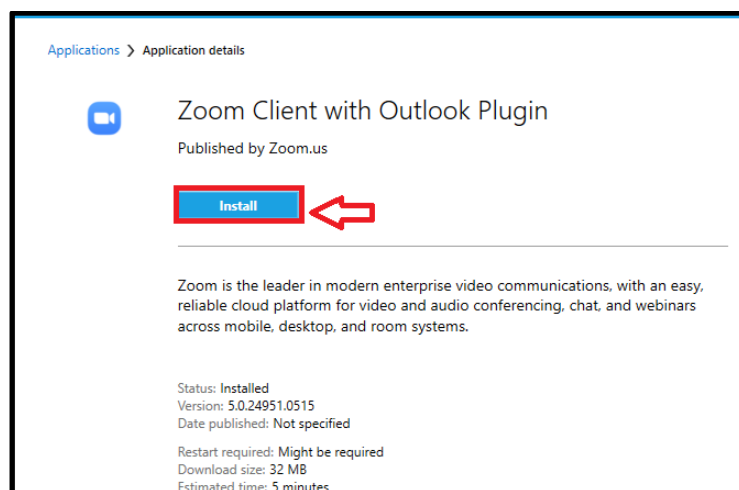

Step 2: On the desktop find and double click on the Software Center icon

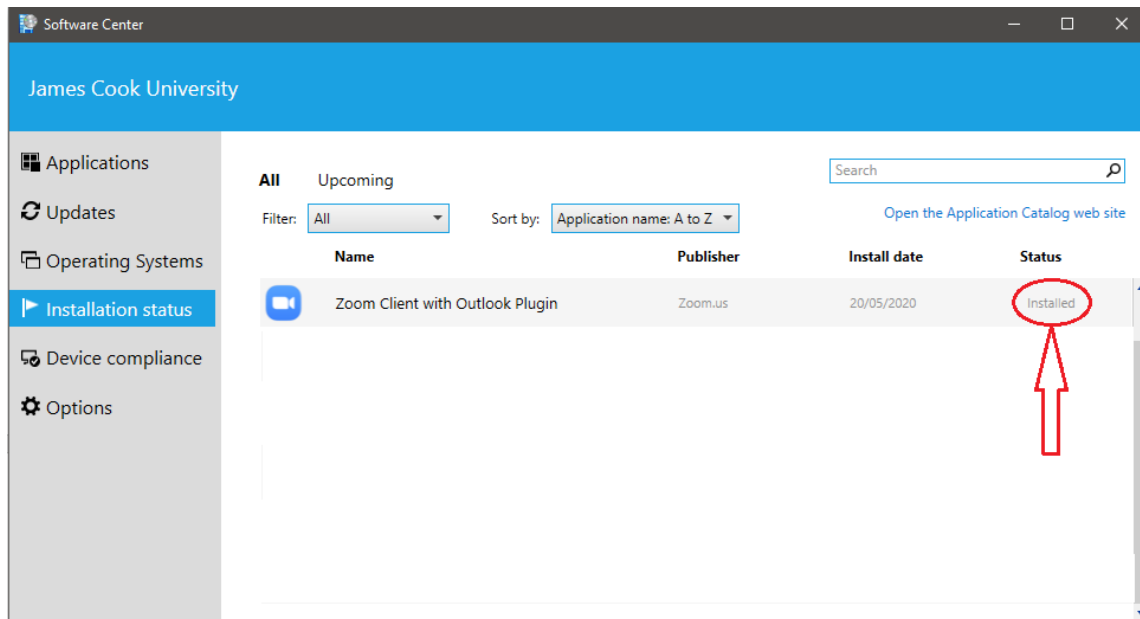

Step 3: Click on Applications options on the left panel and then find and click on ZOOM to install the latest update.

Step 4: On the window that appears click on the install button to start the update.

Step 5: To check the progress, click on the “Installation Status” option on the left panel.

NOTE: Once the status says **installed** the latest JCU tested version of the ZOOM application will be available for use on the device.
